

NATIONAL PKU AWARENESS DAY DECEMBER 3, 2022

CELEBRATE WITH EMORY UNIVERSITY DEPARTMENT OF HUMAN GENETICS!

The first National PKU Awareness Day, December 3, 2012, was established by a Congressional Resolution introduced by two U.S. Senators (Johnny Isakson from Georgia and John Kerry from Massachusetts). The resolution explains what PKU is, the history of PKU, and the importance of sharing information about PKU with others. Join the celebration and spread awareness with Emory University Department of Human Genetics!

SPREAD AWARENESS TO YOUR SOCIAL MEDIA NETWORK

If you use social media platforms such as Instagram, Twitter, or Facebook, **post on your status an announcement for National PKU Awareness Day on December 3rd**. Share the following web links:

Emory Resources for individuals and families affected by PKU

- Metabolic Genetics Clinic
<https://med.emory.edu/departments/human-genetics/patient-care/metabolic-genetics-clinic/index.html>
- Medical Nutrition Therapy for Prevention (MNT4P)
<https://mnt4p.org/>
- Metabolic Camp
<https://metcamp.net>

Non-profit organizations that collaborate with Emory to support individuals and families affected by PKU

- National PKU Alliance <http://www.npkua.org>
- Georgia PKU Connect <http://georgiapku.org>

DONATE TO RAISE MONEY AND AWARENESS

Donate any amount to raise money and awareness for PKU. Proceeds will benefit Metabolic Camp-- Emory DOHG's model, research-based educational summer program for young women living with PKU-- which will take place on Emory campus June 19-24, 2023. Donate at <https://metcamp.net/get-involved/#donate>.
